

YASIR KHAN

Senior Mobile Application Developer | Android (Kotlin) | Flutter (Dart)

Mardan, Khyber Pakhtunkhwa, Pakistan | ykhkpk@gmail.com | +92 315 0012413 | linkedin.com/in/yasir-khan-986152193

PROFESSIONAL SUMMARY

Senior Mobile Application Developer with 5+ years of experience designing, developing, and delivering scalable Android and Flutter applications from concept to production. Successfully delivered 11+ commercial mobile applications across AI, communication, utility, navigation, productivity, design, and Islamic domains. Expert in Kotlin, Java, Flutter, Jetpack Compose, Clean Architecture, MVVM, Hilt, Riverpod, Firebase, REST APIs, WebSockets, Room Database, and AI/LLM integration. Experienced in mentoring junior developers, collaborating directly with clients, estimating project timelines, breaking features into deliverable tasks, and delivering high-quality production-ready applications.

CORE HIGHLIGHTS

- 5+ Years Professional Experience | 11+ Mobile Applications Delivered
- Android Native & Flutter Expert | Kotlin • Java • Dart | Jetpack Compose
- Clean Architecture | MVVM & MVI | AI / LLM Integration | Firebase Ecosystem
- WebSocket Real-time Applications | Client Communication | Junior Developer Mentoring | Agile/Scrum

PROFESSIONAL EXPERIENCE

Mobile Application Developer

Ainsoftech — Lahore, Pakistan | May 2022 – Present

Quran Kareem (Android Native)

- Architected and developed a premium offline-first Islamic application using Kotlin, Jetpack Compose, Hilt, MVVM, and Clean Architecture.
- Built a real-time Qibla compass using Rotation Vector sensors, GeomagneticField correction, and Canvas rendering.
- Developed a worldwide prayer times engine supporting multiple calculation methods with GPS auto-detection.
- Implemented a smooth 14-line Quran reader with synchronized audio playback and active Ayah highlighting.
- Optimized performance through modular architecture and reusable components.

Stylo AI (Flutter)

- Developed an AI-powered outfit recommendation application using Flutter, Riverpod, and Large Language Models.
- Integrated weather, occasion, and image analysis for intelligent recommendations.

AI Prompt App (Flutter)

- Developed AI Prompt App with LLM chat, streaming responses, and real-time audio microphone streaming.
- Built speech-to-text pipeline capturing user voice, streaming audio to transcription service in real-time.

Additional Projects

Successfully developed production-ready applications including Scoop Messenger, Canvas Graphic Design Editor, QR Code Scanner, GPS Speedometer, Path Tracker, WhatsApp Status Saver, AI Utilities, and Productivity Applications.

Additional Responsibilities

- Mentored junior Android and Flutter developers; conducted code reviews and maintained coding standards.
- Collaborated directly with clients to gather requirements; estimated project timelines and feature implementation.
- Broke large projects into sprint tasks; worked closely with UI/UX designers and backend teams.
- Participated in architecture and technical design decisions.

Mobile Developer

CodingStorms Technology | January 2022 – May 2022

- Developed Android Native and Flutter applications for multiple clients.
- Integrated Firebase Authentication, Firestore, Cloud Storage, REST APIs, and Payment Gateways.
- Collaborated directly with clients to deliver production-ready applications.
- Participated in Agile development processes.

Junior Mobile Developer

Solution of Technologies | 2020 – 2021

- Developed Android applications using Kotlin and Java.
- Integrated REST APIs and Firebase services.
- Followed MVVM and Clean Architecture principles.
- Collaborated within Agile development teams.

KEY PROJECTS

Quran Kareem — Android • Kotlin • Jetpack Compose • Hilt • Clean Architecture

Offline-first Islamic application featuring Prayer Times, Qibla Compass, Quran Reader, Audio Synchronization, and Hijri Calendar.

Scoop Messenger — Android • WebSocket

Real-time messaging platform featuring Video Calling, Audio Calling, Push Notifications, Media Sharing, and Real-time Chat.

Stylo AI — Flutter • Riverpod • LLM

AI-powered fashion recommendation platform using Image Analysis, Weather Data, Occasion Detection, and AI Recommendations.

Canvas Graphic Editor — Android • Jetpack Compose • Canvas API

Features Drawing Layers, Text Editing, Filters, and High Resolution Export.

GPS Speedometer — Android • Google Maps • Room Database

Features Analog & Digital Speedometer, Path Tracking, Trip History, and Location Logging.

AI Prompt App — Flutter • Riverpod • LLM • Speech-to-Text

AI-powered prompt toolkit with LLM chat, real-time audio microphone streaming speech-to-text for voice input.

WhatsApp Status Saver — Android

Published utility application featuring fast local media scanning and batch saving.

TECHNICAL SKILLS

Languages: Kotlin, Java, Dart

Mobile Frameworks: Android SDK, Flutter, Jetpack Compose, Compose Multiplatform

Architecture: Clean Architecture, MVVM, MVI, SOLID Principles, Modularization, Repository Pattern

Android: Coroutines, Flow, StateFlow, SharedFlow, Navigation Component, Room Database, WorkManager, DataStore, Google Maps SDK, Canvas API, Sensors API

Flutter: Riverpod, Provider, Flutter SDK

Backend & Networking: REST APIs, Retrofit, Ktor, WebSocket, Firebase, Node.js (Basic)

Firebase: Authentication, Firestore, Cloud Storage, Cloud Messaging (FCM), Crashlytics

AI: LLM Integration, Prompt Engineering, Speech-to-Text, Audio Streaming, Image Analysis

Development Tools: Git, GitHub, Android Studio, VS Code, Google Play Console, CI/CD, Agile/Scrum

EDUCATION

Bachelor of Science in Computer Science

Sarhad University — Peshawar, Pakistan
