YASIR KHAN

Senior Android Developer | Kotlin • Jetpack Compose • Modern Clean Architecture

Mardan, KP, Pakistan | ykhkpk@gmail.com | +92 315 0012413

PROFESSIONAL SUMMARY

Senior Android Developer with 5+ years of experience engineering, architecting, and deploying high-performance native Android applications to the Google Play Store. Specialist in Modern Clean Architecture (Domain, Data, Presentation), strict SOLID principles, Kotlin Coroutines, and reactive asynchronous programming with Flow and StateFlow. Deep expertise in Jetpack Compose, Material Design 3, Room database persistence, Hilt dependency injection, background processing with WorkManager and Foreground Services, Android NDK/MediaCodec multimedia pipelines, and WebSockets/WebRTC real-time systems. Accomplished technical lead experienced in enforcing robust design patterns, conducting in-depth code reviews, and publishing commercial applications serving thousands of active users.

CORE HIGHLIGHTS

- 5+ Years Dedicated Native Android Experience
- Modern Clean Architecture (Domain/Data/Presentation/Core)
- Modern Android Stack: Kotlin, Jetpack Compose, Hilt
- Room SQLite Database with Multi-Threaded DAOs
- Multimedia & Low-Level: MediaCodec, FFmpeg, Canvas 2D
- 10+ Commercial Android Apps Shipped to Google Play
- Strict SOLID Protocols & Dependency Inversion
- Reactive Concurrency: Kotlin Coroutines, Flow, StateFlow
- Real-Time Systems: WebSockets & WebRTC Voice/Video
- Google Play Console, ProGuard/R8 & Automated CI/CD

PROFESSIONAL EXPERIENCE

Senior Android Developer (Lead Android Architect)

May 2022 – Present

Ainsoftech — Lahore, Pakistan

- **Quran Kareem (Android Native — Kotlin, Jetpack Compose, Room Database, Clean Architecture):** Architected full native Android Islamic companion using Clean Architecture and SOLID design; engineered Room SQLite with Coroutines and reactive Flow streams; built real-time sensor-fused Qibla compass using SensorManager and GeomagneticField correction; created 14-line Mushaf reader with background audio playback.
- **Scoop Messenger (Android Native — Kotlin, Jetpack Compose, WebSockets, WebRTC, Foreground Services):** Built enterprise-grade real-time messaging and VoIP calling suite with WebRTC video/voice and WebSockets; engineered persistent foreground services achieving 99.5% connection uptime; implemented Room caching and Firebase Cloud Messaging.
- **Video Editor & FFmpeg Media Extensions (Android Native — Kotlin, MediaCodec, FFmpeg, Canvas 2D):** Designed hardware-accelerated video editing pipeline using MediaCodec and custom NDK/FFmpeg extensions for video trimming, filtering, and transcoding; developed 60fps video timeline scrubber using Jetpack Compose and Canvas 2D.
- **Custom Android IME & Keyboard Utility (Android Native — Kotlin, InputMethodService, Room):** Developed high-performance system input method keyboard supporting multilingual input, dynamic theme engine, and fast emoji indexing with sub-16ms latency.
- **Engineering Leadership:** Mentored junior Android developers on Kotlin idioms, Compose state hoisting, and Clean Architecture; managed Google Play Store release tracks.

Android Developer

January 2022 – May 2022

CodingStorms Technology — Islamabad, Pakistan

- Developed commercial Android applications using Kotlin, Jetpack Compose, and XML ViewBinding.
- Built robust networking modules with Retrofit2, OkHttp3, Moshi, and coroutine-based error handling.
- Implemented reactive UI states using ViewModel, StateFlow, and LiveData following Material Design 3 guidelines.
- Integrated Firebase Authentication, Cloud Firestore, Firebase Storage, and Google Play In-App Billing.
- Collaborated within Agile Scrum sprints, performed peer code reviews, and delivered production AABs to Google Play Console.

Junior Android Developer

2020 – 2021

Solution of Technologies — Islamabad, Pakistan

- Built native Android applications using Java, Kotlin, XML layouts, and ViewBinding.
- Implemented MVVM architecture, Retrofit networking modules, Room database persistence, and Firebase integration.
- Diagnosed memory leaks and UI jank using Android Studio Profiler; participated in daily standups and QA bug resolution.

KEY PROJECTS

Prompi & AI Prompt Suite (Kotlin, Jetpack Compose, OkHttp SSE, Speech-to-Text, Room): AI prompt studio with real-time streaming LLM responses, token-level buffering, and template-driven prompt generation with Room caching.

Quran Kareem Android (Kotlin, Compose, Room, SensorManager, Clean Architecture): Offline Islamic companion app with Clean Architecture, Kotlin Coroutines, Room database, sensor-fused Qibla compass, and background audio streaming.

Scoop Messenger (Kotlin, WebSockets, WebRTC, Foreground Services): Real-time communication suite featuring audio/video calling, group messaging, and persistent background connection management with 99.5% uptime.

Video Editor & FFmpeg (Kotlin, MediaCodec, FFmpeg, Canvas 2D): Hardware-accelerated video processing suite enabling real-time frame slicing, transcode pipelines, audio track extraction, and custom video filters.

Custom Android IME (Kotlin, InputMethodService, Room): System input method keyboard with high-speed key-event processing, multilingual dictionary caching in Room, and customizable aesthetic themes.

GPS Speedometer (Kotlin, FusedLocationProvider, Foreground Service): High-accuracy real-time telemetry app calculating speed, heading, trip distance, and altitude with custom Canvas 2D gauges.

TECHNICAL SKILLS

Languages: Kotlin, Java, C/C++ (NDK Basics)

Android Frameworks: Jetpack Compose, Material Design 3, XML Layouts, ViewBinding, Navigation Component, Canvas 2D, Animations API, InputMethodService

Architecture & Concurrency: Modern Clean Architecture (Domain/Data/Presentation/Core), Strict SOLID Principles, MVVM, MVI, Repository Pattern, Kotlin Coroutines, Flow, StateFlow, SharedFlow

Dependency & Storage: Hilt, Dagger2, Room Database, SQLite, DataStore, SharedPreferences

System & Media: WebSockets, WebRTC, Android MediaCodec, WorkManager, Foreground Services, SensorManager, CameraX

Networking & Cloud: Retrofit2, OkHttp3, Ktor Client, Firebase (Auth, Firestore, Cloud Storage, FCM, Crashlytics)

DevOps & Tooling: Android Studio, Gradle, ProGuard/R8, Google Play Console, Git, CI/CD Pipelines

EDUCATION

Bachelor of Science in Computer Science (BSCS) — Sarhad University of Science & IT Graduated
