YASIR KHAN

Senior iOS Developer | Swift 6 • SwiftUI • Modern Clean Architecture

Mardan, KP, Pakistan | ykhkpk@gmail.com | +92 315 0012413

PROFESSIONAL SUMMARY

Senior iOS Developer with 5+ years of experience architecting, developing, and shipping high-performance native iOS applications from concept to App Store production. Specialist in Modern Clean Architecture (Domain, Data, Presentation, Core), strict SOLID principles, protocol-driven decoupled architectures, and Swift 6 strict concurrency (Actors, Sendable, zero data races). Expert in low-level graphics and document engines (PDFKit, CoreText, CoreGraphics), on-device machine vision (Apple Vision OCR), hardware-backed cryptography (CryptoKit, Keychain Services), offline-first reactive persistence (GRDB.swift SQLite DatabasePool, SwiftData @ModelActor), peer-to-peer mesh networks (MultipeerConnectivity), and system-level iOS integrations (App Intents, Background URLSession daemons). Proven engineering leader with experience establishing code review standards, driving technical design decisions, and mentoring mobile developers.

CORE HIGHLIGHTS

- 5+ Years Dedicated Native iOS Experience
- Modern Clean Architecture (Domain/Data/Presentation/Core)
- Swift 6 Concurrency: Actors, @Sendable, @ModelActor
- GRDB SQLite DatabasePool & AsyncStream Observation
- System Integrations: App Intents & Background URLSession
- 7+ Production iOS Applications Shipped
- Strict SOLID Protocols & Dependency Inversion
- In-Place PDF Vector Rendering & Raster Erasure
- P2P Encrypted Mesh (MultipeerConnectivity & CryptoKit)
- App Store Connect, TestFlight & Automated CI/CD

PROFESSIONAL EXPERIENCE

Senior iOS Developer (Lead iOS Architect)

May 2022 – Present

Ainsoftech — Lahore, Pakistan

- **PDFEditor (Native iOS 18+ — Swift 6, SwiftUI, CoreText, PDFKit, SwiftData):** Architected an enterprise vector PDF editor utilizing Modern Clean Architecture and strict SOLID principles; pioneered true in-place PDF text and graphics editing via low-level PDFKit, CoreText, and CoreGraphics with surgical background raster erasure; integrated Apple Vision OCR, multi-tier compression, and Command-Pattern Undo/Redo.
- **AetherChat (Native iOS — Swift 6, SwiftUI, SwiftData, MultipeerConnectivity, CryptoKit):** Engineered an offline-first P2P mesh messenger over MultipeerConnectivity; implemented hardware-backed Ed25519 digital signatures, Curve25519 Keychain key exchange, ChaCha20-Poly1305 encryption, WebRTC calling, and SwiftData @ModelActor synchronization.
- **QuickSnap Video (Native iOS — SwiftUI, App Intents, Background URLSession, PhotoKit):** Developed an automated video download engine integrated with Apple Action Button and Back Tap triggers via App Intents, utilizing background nsurlsessiond for uninterrupted downloads to Camera Roll.
- **Quran Kareem (Native iOS — Swift 6, SwiftUI, GRDB SQLite, Clean Architecture):** Architected full offline-first Islamic companion using Clean Architecture and SOLID design; built GRDB DatabasePool multi-reader concurrency with reactive AsyncStream observations, sensor-fused Qibla compass, and 14-line Mushaf reader with audio sync.
- **Engineering Leadership:** Mentored junior iOS developers, established Swift 6 strict concurrency standards, conducted code reviews, and managed App Store distribution.

iOS Developer

January 2022 – May 2022

CodingStorms Technology — Islamabad, Pakistan

- Developed and maintained native iOS applications in Swift, SwiftUI, and UIKit for startup and enterprise clients.
- Built robust networking layers using URLSession, async/await, Combine, and RESTful APIs with secure token storage in Apple Keychain.
- Translated complex Figma design systems into responsive, pixel-perfect iOS user interfaces adhering to Apple Human Interface Guidelines (HIG).
- Integrated Firebase services (Auth, Firestore, FCM) and Apple Pay payment processing into client applications.
- Managed TestFlight beta deployments and successfully submitted production releases to App Store Connect.

Junior iOS Developer

2020 – 2021

Solution of Technologies — Islamabad, Pakistan

- Developed native iOS applications using Swift and UIKit with MVVM architecture and modular components.
- Implemented local persistence using CoreData and SQLite, and integrated third-party SDKs using Swift Package Manager.
- Authored unit tests with XCTest, profiled UI bottlenecks via Instruments, and assisted with App Store release preparation.

KEY PROJECTS

Prompi & AI Prompt Suite (Swift 6, SwiftUI, LLM Streaming, Speech Framework, SwiftData): AI prompt studio with real-time streaming LLM responses, Apple Speech live dictation, and template-driven generation with SwiftData caching.

PDFEditor (Swift 6, SwiftUI, PDFKit, CoreText, Vision OCR, SwiftData): Vector PDF editor with in-place text/glyph modification, background erasure, Vision OCR, and multi-version snapshots.

AetherChat (Swift 6, SwiftUI, MultipeerConnectivity, CryptoKit, SwiftData): Decentralized P2P mesh messenger with Ed25519/Curve25519 cryptography, WebRTC calling, and voice notes with live waveform metering.

QuickSnap Video (SwiftUI, App Intents, Background URLSession, PhotoKit): Automated video ingestion utility integrated with Apple Action Button via App Intents and out-of-process background downloads.

Quran Kareem iOS (Swift 6, SwiftUI, GRDB SQLite, Clean Architecture): Offline-first Islamic companion with high-performance GRDB DatabasePool, sensor-fused Qibla compass, and audio sync.

QRScanPro (Swift 6, SwiftUI, AVFoundation, VisionKit): High-speed QR/barcode scanner with custom animated viewfinder, batch scanning, and history export.

TECHNICAL SKILLS

Languages: Swift 6, Swift 5.x, Objective-C (Interoperability)

iOS Frameworks: SwiftUI, UIKit, SwiftData, GRDB (SQLite), PDFKit, CoreText, CoreGraphics, Apple Vision Framework, MultipeerConnectivity, CryptoKit, App Intents, AVAudioSession, PhotoKit, Background URLSession, Keychain Services, XCTest

Architecture & Concurrency: Modern Clean Architecture (Domain/Data/Presentation/Core), Strict SOLID Principles, MVVM, MVI, Repository Pattern, Command Pattern, Swift 6 Strict Concurrency (Actors, @Sendable, @ModelActor, Task Groups)

Data & Cloud: GRDB (SQLite DatabasePool), SwiftData, CoreData, SQLite, REST APIs, URLSession, Firebase (Auth, Firestore, Cloud Storage, FCM)

DevOps & Tooling: Xcode, Instruments (Allocations, Time Profiler, Leaks), Swift Package Manager (SPM), Git, TestFlight, App Store Connect, CI/CD

EDUCATION

Bachelor of Science in Computer Science (BSCS) — Sarhad University of Science & IT Graduated
